SUIT AGAINST LUMBER TRUST

National Department of Justice Begins Proceedings.

MOST OPPRESSIVE MONOPOLY

Prosecution of Combine In Eastern States and New England Is Under Recent Standard Oil Decision of Supreme Court.

New York, May 20.—Right on the heels of the supreme court decision in the Standard Oil case, the department of justice has inaugurated in the United States circuit court in this city the first of a series of prosecutions against what is regarded by many as the most oppressive monopoly in the country, the so-called lumber trust.

As evidence that the government never doubted the outcome of the Standard Oil proceeding it may be stated that the lumber trust prosecution has been in course of preparation for more than a year, along the lines followed in hunting down the Rockefeller monopoly. The first suit was filed yesterday. It is directed against the lumber concerns in an agreement which shuts consumers in New England and a part of the middle states from direct dealings with lumber producers. Other prosecutions will be inaugurated as rapidly as the evidence can be whipped into shape.

This is the government's first anti-trust suit conforming to the supreme court's Standard Oil decision, in that it alleges "undue" and "unreasonable" restraint of trade of the consumer and the manufacturer. The government's suit is replete with sensational allegations, and it is asserted that builders and consumers of lumber the country over are at the mercy of the retailers' organization in different sections of the United States.

The suit filed yesterday is against the Eastern States Retail Lumber Dealers' Association, which is the central body of nine local organizations covering five states, the District of Columbia and the cities of Baltimore and Philadelphia.

Attorney General Wickersham and his special assistant, Clark McKercher, have devoted more than a year to gathering the evidence on which the suit is based. This evidence includes copies of the alleged agreements, black lists and reports of the various organizations, branding wholesalers and retailers who have dared to violate the rules of the association as "poachers," "marvericks," "scalpers" and "illegitimate dealers," to whom "short shrift" must be applied.

SAFE BLOWERS LOSE OUT

Dynamite Explosion at Elwood Lands Outer Door Against Inner.

Joliet, Ill., May 20.—The James C. Beattie private bank of Elwood was saved from a looting by miscalculations of the safe blowers, who in discharging the dynamite blew up the outer door of the vault in such a way as to cause it to fall against the inner door.

Finding it impossible then for lack of time to get at the inner compartments, the bandits left on two stolen horses, taken from Chris Nelson's barn. The animals were found in Joliet, which indicates the course of the frustrated robbers. The explosion was not heard by any of Elwood's citizens.

REPRESENTATIVES OF BIBLE SOCIETY TO SPEAK HERE SUNDAY

Representatives of the American Bible Society will preach in a number of Ypsilanti churches on Sunday to lay before the people the purposees and needs of their society. This is the society which has recently been endowed by Mrs. Russell Sage to the extent of $500,000, which sum it is hoped may reach $1,000,000. It is strictly undenominational. Bibles are printed by them in all languages, and these are furnished missionary societies at one-third the cost of producing them, so that this leaves a deficit to be made up.

Rev. J. A. McKee has spent two years in Siam as a missionary and is now a member of the staff of workers in the American Bible Society. Rev J. P. Horton is general secretary for the American Bible society of the northwest, with headquarters in Chicago.

SERIOUSLY INJURED BY FRIGHTENED HORSE

Webb Kay, bookkeeper at Webster Bros.' lumber yard, met with an extremely painful accident this morning. A D., J. & C. car passing on Cross street frightened the horse he had left standing and he started to run. Mr. Kay sprang to his head but the horse had got such a headway that he dragged Mr. Kay on along the ground, kicked him and finally when he fell dragged the carriage across his prostrate body.

Curry Hicks, the Normal coach, saw the accident. A couch was brought from the gymnasium and Kay put on this until a doctor could be summoned. It was found upon examination that no bones had been broken and no internal injury done. His head, arms and knees are bandaged liberally and he is covered with bruises, but will probably come through the experience without harm. The horse was later caught.

Mr. and Mrs. Webster and Webb Kay were intending to motor on Sunday to Tecumseh to spend the day with Mr. Kay's mother. She has been notified of this interference with their plans and will come to to Ypsilanti to spend the day with her son at Mr. Webster's.

LADIES AS WELL AS MEN WELCOME TO BANQUET

There seems to be an idea prevalent that ladies are not invited to the banquet to be given Tuesday evening for President Jones. The impression, however, is false and the committee in charge wishes it generally understood that ladies as well as men will be welcome to this important function. The women in charge of the banquet are very anxious that tickets be secured early in order that plans may be well arranged.

The dinner will be served at 6:30 Tuesday evening and a splendid program of toasts is announced.

New York, May 20.—William Rockefeller, after a meeting of Standard Oil directors and lawyers, said that he could not announce any plans for the corporation.

GUARD AGAINST TROUBLE

Alaska Railway People Want No Repetition of "Cordova Coal Party."

Seward, Alaska, May 20.—In anticipation of a repetition of the "Cordova coal party" when the steamer Edith arrives here with a cargo of Canadian coal, the Alaska Northern Railway company applied to United States Marshal Whitelesy for protection.

A strong force of deputies was sworn in to protect the coal. There has been much talk of a plan to follow the example of the Cordova people and throw the coal into the sea.

The commencement exercises will take place on the evening of June 16 at seven o'clock in the First M. E. church. It is planned that these exercises will be over at 9 o'clock and that the alumni meeting will then follow. A banquet will finish the evening, but whether this will be held in the Methodist church or the Masonic Temple has not yet been determined.

Students Enjoy Successful Picnic

The high school outing on Friday was a huge success. Thursday night F. U. Quillin, the principal, and boys went out to Cady's Corners and made camp in approved Boy Scout style, with camp-fire and all the features, and they carried along their supper and breakfast. In the morning all but two returned to replenish their supplies.

Three chartered cars carried the high school students out to camp at 9:45 Friday morning. Upon their arrival cool lemonade regaled the company. At noon dinner was partaken of by classes. Lemonade and ice cream, as well as transportation, had been furnished by the fund from the play given in the winter. "The Merchant of Venice." Each class, arranged in a group by itself, had some distinctive class dish. The seniors had crushed strawberries to eat with the ice cream; the juniors had pineapple for the same purpose; the sophomores, a bushel basket of oranges and bananas; and the freshmen, wafers.

A tug of war with two captains and 12 men on a side, basket ball, Newcomb, gathering flowers, and visiting occupied the afternoon. Dr. Paton drove out and stayed for dinner, so that his services might be at hand in case they were needed, which proved not to be the case. The students were brought back to town about five o'clock.

FREDERICK ROBIN MISSING

Chicago Bank Employe Leaves for Unknown Destination with $20,000.

Chicago, May 20.—P. F. McCarthy & Co., Thirty-Ninth and State streets, one of the largest private banking concerns in the city, have been robbed of a large amount—believed to approximate $20,000—by Frederick Robin, an employe, who has fled from Chicago, and is now being hunted by detectives employed by the Fidelity & Deposit company of Maryland, which had bonded the embezzler for $10,000.

The bank, which was established in 1888, has deposits of $200,000, and the defalcation will not embarrass it in any way.

PRESBYTERIAN WOMEN HOLD PRAISE SERVICE AT CHURCH CHAPEL

A foreign missionary praise service was held by the ladies of the Presbyterian church at the chapel on Friday afternoon. The ladies of the other church societies in town were invited and likewise the church ladies from Ann Arbor, but the latter were unable to come. About fifty ladies were present. Mrs. Townsend, nee Muriel Webb, sang two solos, Mrs. W. L. Kishlar read a selection and Miss Hattie Swift read a poem and a tract. The opening exercises were conducted by Mrs. W. L. McCullough.

The feature of the afternon was an address by Mrs. Graves of Detroit. The jubilee meetings held recently in 36 of the largest cities culminated in a big round-up in New York City and Mrs. Graves had attended as a delegate. She gave a very thorough account of what had occurred at this great meeting and said that the events transpiring there would have furnished material for four lectures. The offering taken amounted to over $33. Delicious refreshments were served under the chairmanship of Mrs. Will Eddy.

Coronation Pomp In the Making; "Building" a Robe For the King

The accompanying picture shows the "pinning" of the ermine for the train of one of King George's coronation robes, an operation that calls for the use of over 15,000 pins. For the train 500 skins and 650 tails were used. The order to make the coronation robes for the king and queen was given to Wilkinson & Son, who enlisted the services of various firms, specialists in their own branches. Behind the table on which the "pinning" is being done may be seen the cape of the robe. The king will wear three robes during the coronation—the royal crimson robe of state, which is worn until just before the anointing; the imperial mantle of cloth of gold and the royal robe of purple velvet, in which his majesty leaves the abbey.

MADERO DELAYS CAPITAL VISIT

Not to Go to Mexico City until De La Barra Is President.

HEAD OF INSURRECTOS FICKLE

Changes His Mind with Great Frequency—Work of Reorganizing Republic from Juarez Still Going On.

El Paso, May 20.—Francisco I. Madero is not going to Mexico City real soon. Yet he said he was going right away. Even today he was going right away. Tonight he is not going until De La Barra becomes president.

The provisional president of Mexico issued a formal statement declaring that he had never thought it advisable from the very first to start at once, although he made preparations to start soon as possible.

"Lately it has been indicated to me," he declared, "that the government of Diaz has the same opinion as I concerning the time when I should go to Mexico. Therefore I can definitely announce that I will not go to the capital until after Mr. De La Barra has received the executive chair."

A few hours ago the provisional president said that he was not afraid of any reported plots to assassinate him when he got to Mexico, and that he was going at once, that it was his duty. Now it is different, but the two statements are in keeping with that of last week made by the same man when in the morning he declared that his men should not fight in Juarez. In the afternoon at 4, he declared that they should. Twenty minutes later he said they should not and at midnight said they could, after they had practically taken the town of their own accord.

Madero will now stay in Juarez until Diaz leaves office, meantime sending his gubernatorial appointees out to their posts in the various Mexican states and transacting such other business as comes before him. His cabinet remains with him, or such of the members as are not being dispatched to Mexico as governors and daily meetings for the discussion of plans for restoring peace are held.

The insurrectos are going to work Mexico over until the old republic will be hard to recognize, if they have their way. They have ideas and are preparing to put them into execution. Gambling and bull fighting are to be stopped in the republic.

And since it is known that Madero is strictly against gambling in any form, the national lottery and all gambling rights will eventually go.

REYES STOPS IN HAVANA

Mexican Ex-Minister of War Makes Sudden Change in Plans.

Havana, May 20.—General Barnardo Reyes, ex-minister of war of Mexico, arrived here on board the steamship Ipiranga on his way to Mexico. General Reyes suddenly changed his plans and had his baggage hastily put ashore, saying that he had been directed to remain in Havana some days.

He was reticent when an interview was sought. The presumption here is that, in consequence of the protest of Madero against the return of Reyes in Mexico, he has been ordered to stop

YPSI HIGH SCHOOL ALUMNI PLANNING TO HELP WORTHY STUDENTS

The officers of the Ypsilanti High School Alumni association and as many of the different committees as could be gotten together held their first meeting Friday evening at the high school to prepare for commencement. Miss Gertrude Breed of Ann Arbor, the vice-president, took the chair in place of the president, W. N. Lister.

It was decided to issue invitations to all the almuni whose addresses were known, enclosing a request that twenty-five cents be sent towards an alumni scholarship fund. By means of these quarter-dollars sent yearly it is hoped that the fund will be large enough presently to admit of giving $50 a year to help a worthy student in his college course. It is expected that as soon as possible the student will repay the money he is loaned. The need of a little timely help has been illustrated in the careers of a number of the brightest students that have gone out from the high school.

RECIPROCITY OUTLOOK.

The political bedfellows which the reciprocity treaty are marshalling will not afford any more satisfaction to the farmers as a whole than it will to the strongest pro treaty partisan to be found. It is unfortunate that a great question cannot be frankly and honestly supported on its merits and not be used as a means of befogging the issue and "forcing from the lips of fear the lies of praise."

The trusts and special interests which have grown enormously wealthy at the public expense by skilful manipulation of tariff schedules we believe are only feigning friendship for the farmer, but because of his having the only real cause of complaint against the proposed treaty in its present form, this gang of protected interests is ringing all the changes on the injustice to the farmer, thus hoping to keep as much dust about their own citadel as possible, so that its vulnerability may not be discovered, and the reciprocity anon successfully aimed at its exposed heel.

The farmer may well pray to be protected from his pseudo friends, and reciprocity from the same old gang of protected "infants" long since dictating to their creators.

YOU DO SUFFER FROM PILES

HERE IS THE WAY TO HEALTH

DILATION and MEDICATION have long been used in the treatment of piles. But until the invention of The NATURA AUTOMATIC MEDICATING DILATOR they have never been used in conjunction with each other. Both of these factors are most beneficial in the treatment of PILES, but either one alone can do no more than afford temporary relief—used together in the NATURA AUTOMATIC MEDICATING DILATOR a quick and permanent CURE is effected.

The benefits of Dilation to the entire system can hardly be overestimated. The use of the NATURA DILATOR will be found beneficial to the nervous system, the heart action, the circulation and gives an exhilarating effect to the entire mental and physical makeup.

Piles often lead to many other disorders to the organs and glands, closely related to the rectal region.

These troubles yield readily to the Natura treatment, as their cause is removed.

MAKE FAST TIME ON SKATES

French Engineer's Invention Permits of Speed of Over Thirty Miles an Hour.

A new form of roller skate, the invention of M. Louis Marchand, a young French engineer, will shortly be seen on this side, a large quantity of them having been imported for the present season.

These skates, which resemble nothing more than miniature bicycles, weigh 25 pounds each, and work automatically. They have thick pneumatic tires and the wheels, of which there are two on each skate, are 12 inches in diameter.

Thirty miles an hour can easily be made by an unexperienced skater with these skates. The skate is clamped to the shoe, and when the foot is raised a spring is automatically wound up around a specially constructed gear attached to the rear wheel. When the foot is put to the ground the pressure releases the spring, unwinds the gear, and revolves the rear wheel at a great rate. Nearly 900 revolutions a minute are thus produced.

COMMON COUNCIL

Ypsilanti, Mich., May 15, 1911

Regular meeting of the Common Council held at the Council Chamber on the above date.

Mayor T. L. Towner presiding.

Present—Ald. Moore, Cornwell, Stevens, Thomas, Lewis, Huston, Worden, Whitman, McDermott, 9.

Absent—Ald. Beal, 1.

Minutes of the last meeting were approved.

Petitions and Communications.

To the Honorable Mayor and Common Council:

Gentlemen—My relative connection (if any exists) came through compact by Ald. Colby and myself by which I was to leave my scales and take the city's and all I could make with them. The city to furnish and keep them in repair. July, 1901, I took charge of the abandoned child—abandoned because no official has said scales by appointment or otherwise. However kept its part of compact closely guarded. When water too deep, Com. Lewis was on hand with pump, peck showel and tile and done the best he could for 7 years. I finally discovered that Engel had graded his yard and roadway succeeded in getting it off that way to Engel's damage and should be corrected. When new plank were wanted they were on hand, new stringers, etc., and all kept up snug for 9 years. Then came a failure to respond. Hence we find this June, 1911, the child unsightly, ragged, the patches badly worn, unsafe and unreliable, every stick of foundation timber rotten and must be replaced. However its conduct thus far has been correct and satisfactory, a bonanza for coal merchants who are now sending over it a very possible 10 thousand tons annually scott free. Doing 9/10 of the weighing and wearing. The city 10/10 of the repairing.

I have studied this problem. Why should the city install scales and run them almost expressly for money-making concerns. By fostering them annually with (mild estimate) $100, taxpayers' money (my diagnosis a failure) a mistake was made in the beginning. Coal men admit they have had an easy thing for 10 years. Why not partly reverse the thing—coal men own the scales, city the weighman, reserving the right for him to weigh all outside customers. That would adjust itself as to arrangement with coal men for his service. Pardon this interference with business that belongs to wiser heads.

We recommend for the good of the public: 1st, fish up $200, necessary to put the plant in tenable condition; 2d, if the city continues publish scale books free for coal merchants, have the word coal and firm name inserted in proper place; 3d, telephone for farmers and coal men, the wonder why the city did not do things often expressed (Had the same feeling myself); 4th, an electric light for weighman. His hours of service is 10. Many hours I have sit by oil lamy, to weigh out an order or weigh in a belated farmer; 5th, unless the scales are raised knee high water mark, a pair of rubber boots for weighman.

The length of time designated for me to have the scales was as long as I wish to stay. That time may not be far away. However I will try to give 10 days' notice. That will give time to get another. I hope he won't be a chump. My ability to condense is limited. I hope for pardon. I am,

Yours very respectfully,

Stops falling hair, or money back.

"I consider Parisian Sage one of the best hair tonics and beautifiers, landruff cures and cleaner, that I have ever used."—Mrs. Katherine W. Johnson, Sheridan, Ind., 1910.

(Continued from page 2)

To the Honorable Mapor and Common Council of the City of Ypsilanti:

Gentlemen—We, the undersigned, petition your honorable body to order that the nuisance from the unsanitary condition of the barn on the street known as Pearson street be abated and that the other bad and unsanitary conditions of said street be abated and that the parties whose properties back against said street be ordered not to throw their garbage, etc., on said street. The buildings that are in such bad condition are a fire trap at the best and are kept so bad from stabling a horse that as the hot weather approaches it i salmost impossible to live on the said street which is capable of being as neat and clean with very little care as any street in the city.

On motion of Ald. Moore same was received and adopted.

STATE OF MICHIGAN, Before the Michigan Railroad Commission:

At a session of the Michigan Railroad Commission held at its offices in the City of Lansing on the 3d day of May, A. D. 1911.

In the matter of rebuilding or strengthening of the bridge on Congress Street, in the City of Ypsilanti, Washtenaw County, Michigan.

Complaint having been received from the City of Ypsilanti, Washtenaw County, that the iron truss bridge at Congress Street in said city, used jointly by said city and the Detroit, Jackson & Chicago Railway Company, is unsafe for traffic and a menace to human life, and an examination and inspection having been made by the Commission on April 7, 1911, at which time the said city and said railway company were represented, and it appearing from such examination and inspection that said complaint is true and that said bridge is unsafe, in its present condition, for public travel and the additional traffic of said railway thereon,

Now Therefore, It Is Hereby Ordered, That you, the said Detroit, Jackson & Chicago Railway Company within thirty (30) days from service of this order, proceed to rebuild or strengthen said bridge so as to make the same safe for traffic of the railway thereon, said rebuilding or strengthening to be according to plans to be submitted to and approved by this commission.

It Is Further Ordered, That pending said rebuilding or strengthening of said bridge, the said railway company shall reduce the speed of its cars over said bridge to not to exceed six (6) miles per hour when passing over the same from the east, and to bring said cars to a stop within twenty (20) feet before entering upon said bridge when coming from the west and pass over said bridge at a rate of speed not to exceed six (6) miles per hour.

CASSIUS L. GLASGOW,
Chairman.
GEORGE W. DICKINSON,
LAWTON T. HEMANS,
Commissioners.

On motion of Ald. Worden, received and filed.

Mayor Towner addressed the Council in part as follows, on the expectations of the coming year, and the work, in part, of the past year:

The Cross street bridge, constructed in 1910, is a commendable piece of work and is, apparently, appreciated by the citizens, the contemplated bridge at Congress street will no doubt be constructed in the near future, in fact the conditions are such that it must, however, I can assure you that it will not be started until satisfactory and proper understanding and agreement is made between the city and the D., J. and C. Ry.

The attention of the council is called to the East Cross street paving, as the same was never completed, this should be done at once, a suitablt top dressing put on, kept wet and soon it would become the best piece of street in any city; and also that the remainder of the street to Huron should, in some manner be treated with a dressing, or paved so that the present nuisance from dust and dirt may be abated.

I am of the opinion that, owing to the large travel which Cross street is subjected to, it should, in the near future, be paved.

I am compelled to call your attention to the unsanitary condition of the alleys in the rear of Congress street stores. Same should receive your attention, and cleaned up at once.

While it is a fact that fires and removals have removed some of our industries, I call your attention to the fact that nature has provided our fair city with the opportunit yto make us, and the city, known the world oved. I refer to the mineral water and believe that the matter should receive prompt action, looking to the erection of a good bath house either by the city or private capital. If done others would soon follow and thus it would add materially to the growth of the city.
